PROFESSIONAL SUMMARY

I build APIs, integrations, administrative tools, and delivery workflows across .NET, Java, TypeScript, cloud platforms, and AI-assisted engineering practices.

SKILLS

Programming: C#, Java, TypeScript, Python, Node

Web: HTML, CSS, SASS, Bootstrap, MDB

Frameworks: .NET, Spring Boot, Entity Framework, Angular

Databases: SQL Server, PostgreSQL, MySQL, Supabase, MongoDB

Platforms: Azure Platform, Google Cloud Platform, Redis, Azure Service Bus

Delivery tools: Git, GitLab, GitHub, Bamboo, Jenkins, Jira, SonarQube

Design and QA: Design Patterns, JUnit, Postman, SoapUI, Draw.io, Whimsical, Excalidraw, Figma, Obsidian, Report Builder

PROFESSIONAL EXPERIENCE

Sr .Net Developer | Urbetrack | July 2024 — April 2026

- Developed RESTful APIs for a real-time fleet-control application covering GPS positioning, fuel, and maintenance workflows.
- Built an AI multi-agent ecosystem with local memory and TDD plus SDD harnesses.
- Created administrative ASPX tools for help desk operations, participated in code review, and managed deployments.

Technologies: .NET, REST APIs, ASPX, TDD, SDD

Sr .Net Developer | Digbang | July 2023 — January 2024

- Created a .NET 7 microservice boilerplate serving a React Native web/backoffice and Android/iOS mobile apps for commercial-center discounts.
- Ran horizontal-scaling experiments for interconnected .NET and Node.js social-messaging apps and detected memory and synchronization problems.
- Supported documentation, estimates, development, tests, and implementation.

Technologies: Envoyer, .NET 7, Azure Platform, Redis, Azure Service Bus, Node.js

Sr Full Stack Developer | Sideas | November 2022 — July 2023

- Worked on a survey personalization app for a client in the Netherlands with Argentina offices.
- Supported requirements understanding, documentation, feature development, and Azure deployments.

Technologies: Azure, .NET Core, Angular, Angular Material

Software Architect | UNX Digital / Grupo Prominente | April 2022 — November 2022

- Defined architecture decisions for communication between applications.
- Implemented a .NET Core API Gateway with Ocelot on Google App Engine.
- Integrated OIDC tokens from GCP to solve authentication; the architecture was validated by Google Argentina and he trained other teams.

Technologies: Google Cloud Platform, Google App Engine, .NET Core, Ocelot, OIDC

Sr Software Developer | UNX Digital / Grupo Prominente | September 2021 — April 2022

- Worked on Apex America modernization.
- Developed .NET Core 5 APIs and services for cross-application business needs.

Technologies: Google Cloud Platform, .NET Core 5, C#, APIs

Ssr .Net Developer | UNX Digital / Grupo Prominente | October 2019 — September 2021

- Worked across Java DDD APIs, ERP components, a Python backup assistant, C#/Java financial application broker components, and backend integrations with Jira, Jenkins, GitLab, and SonarQube.

Technologies: Java, Gradle, Angular, JUnit, Python, C#, HTML, CSS, JavaScript

Sr Software Developer | Codeicus | December 2020 — September 2021

- Built internal credit-area management tools, defined ERP domains, maintained React Native Android/iOS merchandising releases, and reviewed a .NET WCF communication module.

Technologies: Java, Maven, JSF, Draw.io, Whimsical, React Native, C#

Technical Leader | ECIC Systems | December 2018 — October 2019

- Designed BPM solutions with the development team and estimated incidents with technical resolution details, delegation, and project follow-up.

Technologies: BPM, Technical leadership, Estimation, Project follow-up

IT Developer | ECIC Systems | October 2016 — December 2018

- Developed back-end support for BPM-managed business processes, integrated BPM with REST APIs for e-commerce and messaging, linked SQL databases with Softland and Bejerman ERPs, and supported business consulting.

Technologies: BPM, REST APIs, SQL, Softland, Bejerman

Technical Support | ECIC Systems | August 2015 — August 2016

- Provided hardware and software support for S.O.S network operators in Rosario.

Technologies: Hardware support, Software support, Operations

Web Designer | Luxsys S.R.L / Freelance | August 2014 — August 2015

- Built and hosted business websites with WordPress and Hostinger.

Technologies: WordPress, Hostinger, Web design

PROJECTS

Gestión de circuito deportivo | Verified public platform

Centralized, fully responsive platform for managing sports circuits, tournaments, players, news, rankings, and related operations. <https://circuitoarredepadel.com/>

Incoders corporate site and admin platform | Verified public corporate site

Corporate site with an admin panel for estimates and budgets, automatic invoicing, product builder workflows, CRM operations, and a financial dashboard. <https://www.incoders.com.ar/>

Olympus | Codeicus — July 2020 to September 2020

Internal project-management software developed with DDD, Java, and Angular; integrated with Jira, Jenkins, and GitLab APIs and included a JUnit unit test suite.

Infocovid | Codeicus — March 2020 to April 2020

Hotfix participation on a paisanos.io MVP for finding scarce products in nearby stores and supermarkets during COVID-19. <http://infocovid.online/>

Siegwerk São Paulo implementation | June 2018

Productive integration between Softland ERP and LuxEvent BPM at the Diadema plant.

GDS Balancer final project | UTN FRBA — March 2018 to July 2018

Rules engine for GDS for Almundo.com travel agency, covering analysis through design.

UX/UI course final web project | Comunidad IT / Accenture Rosario — May 2016 to July 2016

Web system for sports-court rentals created as the course final project.

UTN Rosario research project | March 2012 to December 2012

Administration resources chair project focused on improving faculty processes.

EDUCATION

Information Systems Engineering | Universidad Tecnológica Nacional, Facultad Regional Rosario

March 2008 — listed as ongoing in the CV | Listed without adding unverified graduation or current-status claims.

Bachiller y Técnico Electromecánico | E.E.T. N°1 "Fray Luis Beltrán"

March 2004 — December 2006 | Secondary technical education.

English training | Open English

May 2021 — listed as ongoing in the CV | Level 2/8 with TOEFL/TOEIC preparation listed in the CV; no fluency claim is added.

English training | Education First

July 2016 — July 2017 | Level 9/16, basic professional competence according to the CV.

Angular 11 | Educación IT

March 2021 — April 2021 | Course listed in verified training.

UX/UI Design | Comunidad IT

May 2016 — July 2016 | Course listed in verified training.

Reporting Services SSRS and Basic Accounting | Educación IT

April 2017 — February 2019 | Reporting Services SSRS was completed April-May 2017; Basic Accounting was completed January-February 2019.
